

WHY SHOULD YOU USE BERMUDA SOD (GRASS)?

IS A SOD (GRASS) LAWN LESS WORK?

Yes, a professional sod lawn needs no special care because it is a healthy mature lawn when installed, whereas a sprigged or seeded lawn requires months of nurturing to reach maturity. Sod is grown under expert supervision from either top quality seed blends or certified hybrid sprigs. After it has been installed, just water. Mow and fertilize your sod (lawn) 4 - 6 weeks after establishment and it will remain a healthy, green carpet of grass, requiring very little maintenance.

WHERE CAN I USE BERMUDA SOD (GRASS)?

Bermuda Sod(Grass) can be installed practically anywhere, once it is in full sunlight. Sod is often used to stop soil erosion and water pollution on slopes where rain would wash away both seed and soil.

CAN SOD (GRASS) WITHSTAND HEAVY USAGE?

Certainly! Bermuda Sod (Grass) establishes itself quickly. In a couple of weeks, it is ready for full use. It creates the perfect surface for lawn games and family outdoor living. With today's various blends of hardy grasses, sod is chosen for parks, golf courses, playing fields, as well as residential homes and commercial landscapes.

WHEN CAN I INSTALL A SOD (GRASS) LAWN?

Sod has revolutionized the lawn business internationally! Now in Barbados you can install a sod lawn anytime during the year. There is no need to wait for the "wet" season to put in your lawn.

IS BERMUDA SOD (GRASS) A GOOD INVESTMENT?

Yes! It's the only way to go...from bare soil to lush, green lawn in just hours. What a convenience! Yet, it's relatively inexpensive to use. In the few hours it takes to install your sod lawn, your property value increases significantly and even more in aesthetic value.

HOW WILL SOD (GRASS) AFFECT OUR ENVIRONMENT?

With today's ecological concerns, more people are considering sod (grass) for its environmental benefits. Sod cools and cleans the atmosphere by reflecting the sun's heat and absorbing carbon dioxide and other harmful pollutants. It releases valuable oxygen and moisture into the air we breathe. As it grows, sod silently contributes to a healthier environment. Sod lawns meet the needs of today's fast-paced demanding lifestyle! The grass will not seed or flower; therefore it will not aggravate allergies.

HOW IS SOD (GRASS) RELATED TO OUR LIFESTYLE?

Today we expect convenience, efficiency and quality in our products. Buildings are going up almost overnight and attractive landscaping is installed in hours. Why wait 1 or 2 years for a new lawn to struggle to maturity when you can have a beautiful sod lawn complimenting your buildings right now? That high quality sod lawn can be conveniently installed in hours, at a surprisingly low cost. **Contact the NCC TODAY!**

Tifway 419 Bermuda Grass is planted from the purest sprig hybrid in the finest prepared soil, allowing for a more beautiful and healthy turf grass. NCC provides optimum cultural care of the sod, which includes mowing, watering and constant fertilization to produce sod that has a dense, uniformly developed blade and healthy, mature root structure, assuring a viable strand of grass.
